PROFESSIONAL EXPERIENCE

Prodigan Software solutions Pvt. Ltd. Bangalore [client: B2BE]

Job: Software Engineer (Developer)

Project Name: SSJ MIGRATION

Duration: June 2017 to December 2017.

Job Description:

Converting[EDI] one conversion from other conversion based on spec file provided by customers.

EDI product enables customer and their trading partner to exchange EDI documents in any format.

It can be an industry-based standard like UN/EDIFACT, ANSI X12 or cXML or a proprietary format,

which might be specific to your trading partner or their business system or their environment. It can

handle any transmission protocol including SMTP (email), (S) FTP, HTTP(S), AS2, MQ, Web Services

and others. B2BE sends and receives electronic documents and data securely over the internet from

your network via the B2BE EDI network to a trading partner's environment or into a trading partners

EDI provider's network based on your and their requirements.

Roles and Responsibilities:
• 	Take development ownership in delivering solution for projects assigned.

• 	Responsible to perform the EDI mapping and reporting development.

• 	Responsible to perform internal testing as well as external testing with customers.

• 	Understand and action on the required connectivity protocols for each project, where

relevant.
